

User Stories/Requirements

1. Users can sign up and log in with their email and password
2. Users can search for available transportation options based on their origin, destination, date, time, and transportation mode. Example: A user should be able to search for transportation options from Vancouver to Victoria on a specific date and time, with transportation types including BC Ferries, Commercial Airlines, Float Plane, Helicopter, and Motor Coach.
3. Users can view the details of each transportation option, such as the provider's name, vehicle type, price, duration
4. Users can select and book a transportation option by providing their dummy payment information and confirming their booking details.
5. Users can view their booking history and cancel or modify their bookings if needed.
